

HOSTEL MANAGEMENT SYSTEM

using PHP and MYSQL

As the name species “HOSTEL MANAGEMENT SYSTEM” is a software developed for managing various activities in the hostel. For the past few years the number of educational institutions are increasing rapidly. Thereby the number of hostels are also increasing for the accommodation of the students studying in this institution. And hence there is a lot of strain on the person who are running the hostel and software’s are not usually used in this context. This particular project deals with the problems on managing a hostel and avoids the problems which occur when carried manually.

A large, semi-transparent watermark of the Logicpro Infosystems LPIT Software Solutions logo is overlaid on the text. It includes the text "Logicpro Infosystems" in blue and red, and "LPIT Software Solutions" in blue below it, with a stylized arrow graphic to the right.
