

MAILSERVER

using PHP and MYSQL

In professional world all the communications are being done by emails. Now a day's mailing server is playing a very important role in our social and economical life. It is one of the secure and fast communicating mediums for a modern era. The mail server is also a good source to connect with your friends; it helps people to be active in social life. Social network helps a person both continue their existing relationship and new friends by reaching out the people you never met before.

A large, semi-transparent watermark of the Logicpro Infosystems LPIT Software Solutions logo is overlaid on the text. It includes the text "Logicpro" in blue, "Infosystems" in red, and "LPIT Software Solutions" in blue below it, along with the stylized arrow graphic.
