

COMPLAINT MANAGEMENT SYSTEM

using PHP and MYSQL

The Online Complaint Management System is an independent application. Online Complaint Management System can be major project. It is a self-contained product. Customers may have complaints regarding some products .Here they will be given an online platform , where they can send complaint based on the product if they find a fault product .The complaints can be assigned to different persons and will get tracked to closure.

A large, semi-transparent watermark of the Logicpro Infosystems LPIT Software Solutions logo is overlaid on the page. It includes the text "Logicpro" in blue, "Infosystems" in red, and "LPIT Software Solutions" in blue below, with a stylized arrow graphic to the right.
