

STUDENT RESULT SYSTEM

using PHP and MYSQL

The project is about to handle all the information of the student regarding admission and examination. Also it manages resources which were managed and handled by manpower previously. The main purpose of the project is to integrate distinct sections of the organization into consistent manner so that complex functions can be handled smoothly by any technical or non-technical persons.

The project aims at the following matters:

- Automation of admission and enrolment as per board, quota, category and available seats.
- Assistance in decision-making.
- To manage information of student, faculty and courses.
- Consistently update information of all the students.
- Reports- To gather all the related information about any application of the HRMS.
